FROM THE HEADLINES THAT UNDERScore THE EXPERIENCE
TO THE WORDS OF AFRICAN-AMERICAN POETS

Chadwyck-Healey Inc. has electronic publications that advance the field of research into Black history. Equally as important, these publications provide a detailed map leading African-Americans from the darkness of anonymity to the enlightenment and awareness of their enormous accomplishments.

**Black Biographical
Dictionaries, 1790-1950**

this extraordinary collection contains more than 30,000 biographical references and thousands of portraits in nearly 300 titles published between 1790 and 1950. “Reference librarians and authors will find this a valuable time saver.”

“Spiral-bound for easy photocopying, both reference librarians and authors will find this a valuable time saver. Any biomedical library that has clientele who publish will want this in their reference collection.”

MARK FUNK, *Head, Collection Development, Medical Library, Cornell University Medical College, NY*

“This guide can spare editors, authors, graduate students, and the librarians who serve them some exasperation, so that the focus can be on scientific content and the merits of propositions put forth, rather than on finding sometimes elusive instructions.”

TONY STANKUS, *Science Librarian, College of the Holy Cross*

TECHNOLOGY DEDICATED TO THE LIBRARIES OF TOMORROW

Dynix Marquis Ahead of the Pack

Many libraries are preparing for the next big step in automation—downsizing from mainframes in favor of systems that not only provide integrated modules but integrate fully with larger computing environments. These libraries are selecting open systems with client-server architecture. They are selecting Marquis.

Marquis is way out in front in terms of client-server expertise. We offered the first true client-server applications for libraries and have already gained the experience of installing dozens of systems. Every module—even Serials—is done and done well. Clear screens, nimble movement between modules, and full features. That's Marquis.

If you're interested in client-server network computing—whether you serve users enterprise-wide, across the country, or around the world—Marquis is ready to work for you.
